Aryan Mishra

ECE'29 || B.Tech Undergrad at IET Lucknow || Building Skills in
Software & Hardware Tech
Lucknow, Uttar Pradesh, India

Summary

I'm Aryan Mishra, pursuing B.Tech in ECE at IET Lucknow (Class of 2029). My goal is to build a strong technical foundation in software development, hardware systems, and electronics engineering, with a long-term interest in creating solutions that make everyday technology smarter and more accessible.

I'm passionate about problem-solving, analytical thinking, and continuous learning. I enjoy challenges—whether in the form of a tough circuit, a tricky coding task, or a fast chess game.

Alongside academics, I actively participate in public speaking, event hosting, and leadership roles, which help me grow as a communicator and team player.

I'm open to opportunities, collaborations, and guidance that can help me grow in the tech ecosystem.
